Subject: Fw: Dimock - Analytical Requests

We need to tighten up the Table 1 today and assist with the ARF. Can we meet at 9:30am in A215 to touch base on Dimock? I'd like to have a branch meeting this afternoon to discuss logistics with everyone involved. Kevin, could you arrange a time that works for those involved?

Rich,

Had a lot of mail to catch up on and didn't see this to late.

I will forward the analytical request form to Cindy Caporale to verify that everything is as agreed and provide explanations where needed.

The SAP will go to my QA folks for review. Hopefully were good there too.

Once were done, our Sample Brokerage will be assigning DAS numbers. We will probably break the request by lab (ie. each lab will get a different DAS number to cover the analysis they are doing). This should make things easier to track.

Talk to you Wednesday.

Subject: Fw: Dimock - Analytical Requests

Fred, Attached are the analytical requests for the sampling here at Dimock. I looked them over and they seem to be basically correct but, I am not used to seeing a method described as "CLP OLC03.2 includes TICs" for 524 vols. I know we have discussed at length what methods would be used.... for example for vols, we were going screen the sample when it came in to determine if the sample was "clean" enough to be run by a 500 (524 etc.) series, and if not an 8000 (8260) series. I understand TICs. So my only issue is how do I know what is being ordered here and what we are agreeing to?

thanks

please feel free to give me a shout on my mobile....

Rich

Rich,
Please see the attached analytical requests which we will be submitting to Ft. Meade. Please review the Analytical Requests and let me know if you approve them so we can officially submit them to Ft. Meade. The approved SAP will also be submitted along with Analytical Requests. Please note that the SAP addresses the notes submitted by Dr. Ludwig this morning.
Thanks,
